Journal of Sports Sciences, 1992, **10**, 641–645

Subject index

Acclimatization, aerobic endurance, haemoglobin, haematocrit, maximal oxygen uptake, blood lactate, cross-country skiers, altitude, 37

Acid–base balance, bicarbonate dosage, alkalosis, base excess, buffering capacity, anaerobic performance, 415

Aerobic endurance, haemoglobin, haematocrit, maximal oxygen uptake, blood lactate, cross-country skiers, altitude, acclimatization, 37

Aerodynamics, throwing technique, biomechanics, discus throw, computer simulation, modelling, 467

Alkalizing agent, anaerobic performance, pH, blood bicarbonate, 425

Alkalosis, base excess, buffering capacity, anaerobic performance, acid–base balance, bicarbonate dosage, 415

Altitude, acclimatization, aerobic endurance, haemoglobin, haematocrit, maximal oxygen uptake, blood lactate, cross-country skiers, 37

Anaerobic performance, acid–base balance, bicarbonate dosage, alkalosis, base excess, buffering capacity, 415

Anaerobic performance, pH, blood bicarbonate, alkalizing agent, 425

Anaerobic power, performance tests, volleyball, $\dot{V}O_2$ max, 131

Anaerobic threshold, blood lactate, maximal lactate steady-state, prolonged exercise, validity, 309

Anaerobic threshold, ventilation, blood lactate, 437

Anthropometry, diving, elite athletes, body composition, proportionality, 451

Anthropometry, statistical methods, geometric models, 275

Arm cranking, arterial oxygen tension, blood volume, cardiac output, echocardiography, maximal oxygen uptake, running, rowing, spirometry, thoracic impedance, 525

Arterial oxygen tension, blood volume, cardiac output, echocardiography, maximal oxygen uptake, running, rowing, spirometry, thoracic impedance, arm cranking, 525

Athletics, biomechanics, jumping, triple jump, 343

Attributions, emotions, importance, satisfaction, 65

Base excess, buffering capacity, anaerobic performance, acid–base balance, bicarbonate dosage, alkalosis, 415

Bicarbonate, buffering, exercise, swimming, 255

Bicarbonate dosage, alkalosis, base excess, buffering capacity, anaerobic performance, acid–base balance, 415

Biomechanics, discus throw, computer simulation, modelling, aerodynamics, throwing technique, 467

Biomechanics, jumping, triple jump, athletics, 343

Blood bicarbonate, alkalizing agent, anaerobic performance, pH, 425

Blood lactate, anaerobic threshold, ventilation, 437

Blood lactate, cross-country skiers, altitude, acclimatization, aerobic endurance, haemoglobin, haematocrit, maximal oxygen uptake, 37

Blood lactate, EMG, sprint running, fatigue, 217

Blood lactate, maximal lactate steady-state, prolonged exercise, validity, anaerobic threshold, 309
Blood lactate, warm-up, recording of injuries, workload, 29
Blood lactate assay, performance assessment, 95
Blood volume, cardiac output, echocardiography, maximal oxygen uptake, running, rowing, spirometry, thoracic impedance, arm cranking, arterial oxygen tension, 525
Body composition, proportionality, anthropometry, diving, elite athletes, 451
Book reviews, 77, 207, 297, 389, 511, 633
Breath-hold times, exercise, pulmonary diffusion capacity, 229
Buffering, exercise, swimming, bicarbonate, 255
Buffering capacity, anaerobic performance, acid–base balance, bicarbonate dosage, alkalosis, base excess, 415

Cardiac output, echocardiography, maximal oxygen uptake, running, rowing, spirometry, thoracic impedance, arm cranking, arterial oxygen tension, blood volume, 525
Children, kinanthropometry, overhead throwing velocity, jumping height, skeletal age, 401
Cohesion, starting status, volleyball, 379
Computer simulation, modelling, aerodynamics, throwing technique, biomechanics, discus throw, 467
Conference communications, 139, 549
Connective tissue, eccentric exercise, spasm, training, creatine kinase, 325
Creatine kinase, connective tissue, eccentric exercise, spasm, training, 325
Cross-country skiers, altitude, acclimatization, aerobic endurance, haemoglobin, haematocrit, maximal oxygen uptake, blood lactate, 37
Cross-country skiers, pubertal growth, maximal oxygen uptake, maximal aerobic power, endurance training, 49
Cross-country skiing, roller skiing, oxygen uptake, economy, lactate, skiing techniques, 3

Discus throw, computer simulation, modelling, aerodynamics, throwing technique, biomechanics, 467
Diving, elite athletes, body composition, proportionality, anthropometry, 451

Eccentric exercise, spasm, training, creatine kinase, connective tissue, 325
Echocardiography, maximal oxygen uptake, running, rowing, spirometry, thoracic impedance, arm cranking, arterial oxygen tension, blood volume, cardiac output, 525
Economy, lactate, skiing techniques, cross-country skiing, roller skiing, oxygen uptake, 3
Elastic energy, take-off, long jump, 533
Elite athletes, body composition, proportionality, anthropometry, diving, 451
EMG, sprint running, fatigue, blood lactate, 217
Emotions, importance, satisfaction, attributions, 65
Endurance running, training state, selection, exercise testing, field testing, middle-distance running, 237
Endurance training, cross-country skiers, pubertal growth, maximal oxygen uptake, maximal aerobic power, 49
Ergogenic aids, lactate, maximal exercise, 243
Exercise, pulmonary diffusion capacity, breath-hold times, 229
Exercise, swimming, bicarbonate, buffering, 255
Exercise testing, field testing, middle-distance running, endurance running, training state, selection, 237

Fatigue, blood lactate, EMG, sprint running, 217

Fatigue, muscle strength, weight-training, 109
Field testing, middle-distance running, endurance running, training state, selection, exercise testing, 237

Geometric models, anthropometry, statistical methods, 275

Haematocrit, maximal oxygen uptake, blood lactate, cross-country skiers, altitude, acclimatization, aerobic endurance, haemoglobin, 37
Haemoglobin, haematocrit, maximal oxygen uptake, blood lactate, cross-country skiers, altitude, acclimatization, aerobic endurance, 37

Importance, satisfaction, attributions, emotions, 65
Individual differences, information processing, skilled performance, team sports, visual perception, 261
Information processing, skilled performance, team sports, visual perception, individual differences, 261

Jumping, triple jump, athletics, biomechanics, 343
Jumping height, skeletal age, children, kinanthropometry, overhead throwing velocity, 401

Kinanthropometry, overhead throwing velocity, jumping height, skeletal age, children, 401
5-km run, running performance, treadmill simulation, metabolic responses, men and women, 119

Lactate, maximal exercise, ergogenic aids, 243
Lactate, skiing techniques, cross-country skiing, roller skiing, oxygen uptake, economy, 3
Long jump, elastic energy, take-off, 533

Maximal aerobic power, endurance training, cross-country skiers, pubertal growth, maximal oxygen uptake, 49
Maximal exercise, ergogenic aids, lactate, 243
Maximal lactate steady-state, prolonged exercise, validity, anaerobic threshold, blood lactate, 309
Maximal oxygen uptake, blood lactate, cross-country skiers, altitude, acclimatization, aerobic endurance, haemoglobin, haematocrit, 37
Maximal oxygen uptake, maximal aerobic power, endurance training, cross-country skiers, pubertal growth, 49
Maximal oxygen uptake, running, rowing, spirometry, thoracic impedance, arm cranking, arterial oxygen tension, blood volume, cardiac output, echocardiography, 525
Men and women, 5-km run, running performance, treadmill simulation, metabolic responses, 119
Metabolic responses, men and women, 5-km run, running performance, treadmill simulation, 119
Middle-distance running, endurance running, training state, selection, exercise testing, field testing, 237
Modelling, aerodynamics, throwing technique, biomechanics, discus throw, computer simulation, 467
Muscle strength, weight-training, fatigue, 109

Overhead throwing velocity, jumping height, skeletal age, children, kinanthropometry, 401
Oxygen uptake, economy, lactate, skiing techniques, cross-country skiing, roller skiing, 3

Performance assessment, blood lactate assay, 95
Performance tests, volleyball, $\dot{V}O_2$ max, anaerobic power, 131
pH, blood bicarbonate, alkalizing agent, anaerobic performance, 425
Physical fitness, rugby union, time–motion analysis, 285
Physiological profiles, positional demands, soccer, 541
Positional demands, soccer, physiological profiles, 541
Prolonged exercise, validity, anaerobic threshold, blood lactate, maximal lactate steady-state, 309
Proportionality, anthropometry, diving, elite athletes, body composition, 451
Pubertal growth, maximal oxygen uptake, maximal aerobic power, endurance training, cross-country skiers, 49
Pulmonary diffusion capacity, breath-hold times, exercise, 229

Recording of injuries, workload, blood lactate, warm-up, 29
Roller skiing, oxygen uptake, economy, lactate, skiing techniques, cross-country skiing, 3
Rowing, spirometry, thoracic impedance, arm cranking, arterial oxygen tension, blood volume, cardiac output, echocardiography, maximal oxygen uptake, running, 525
Rugby union, time–motion analysis, physical fitness, 285
Running, rowing, spirometry, thoracic impedance, arm cranking, arterial oxygen tension, blood volume, cardiac output, echocardiography, maximal oxygen uptake, 525
Running performance, treadmill simulation, metabolic responses, men and women, 5-km run, 119

Satisfaction, attributions, emotions, importance, 65
Selection, exercise testing, field testing, middle-distance running, endurance running, training state, 237
Skeletal age, children, kinanthropometry, overhead throwing velocity, jumping height, 401
Skiing techniques, cross-country skiing, roller skiing, oxygen uptake, economy, lactate, 3
Skilled performance, team sports, visual perception, individual differences, information processing, 261
Soccer, physiological profiles, positional demands, 541
Spasm, training, creatine kinase, connective tissue, eccentric exercise, 325
Spirometry, thoracic impedance, arm cranking, arterial oxygen tension, blood volume, cardiac output, echocardiography, maximal oxygen uptake, running, rowing, 525
Sprint running, fatigue, blood lactate, EMG, 217
Starting status, volleyball, cohesion, 379
Statistical methods, geometric models, anthropometry, 275
Swimming, bicarbonate, buffering, exercise, 255

Take-off, long jump, elastic energy, 533
Team sports, visual perception, individual differences, information processing, skilled performance, 261
Thoracic impedance, arm cranking, arterial oxygen tension, blood volume, cardiac output, echocardiography, maximal oxygen uptake, running, rowing, spirometry, 525
Time–motion analysis, physical fitness, rugby union, 285
Throwing technique, biomechanics, discus throw, computer simulation, modelling, aerodynamics, 467
Training, creatine kinase, connective tissue, eccentric exercise, spasm, 325
Training state, selection, exercise testing,

field testing, middle-distance running, endurance running, 237
Treadmill simulation, metabolic responses, men and women, 5-km run, running performance, 119
Triple jump, athletics, biomechanics, jumping, 343

Validity, anaerobic threshold, blood lactate, maximal lactate steady-state, prolonged exercise, 309
Ventilation, blood lactate, anaerobic threshold, 437
Visual perception, individual differences, information processing, skilled performance, team sports, 261
Volleyball, cohesion, starting status, 379
Volleyball, $\dot{V}O_2$ max, anaerobic power, performance tests, 131
$\dot{V}O_2$ max, anaerobic power, performance tests, volleyball, 131

Warm-up, recording of injuries, workload, blood lactate, 29
Weight-training, fatigue, muscle strength, 109
Workload, blood lactate, warm-up, recording of injuries, 29
